Connor James Weiss
610.462.5913 cweiss1@angelo.edu

Clearance: Active TS/SCI Clearance
Current Full Scope polygraph completed October 2014

Education: M.S.S in Intelligence, Security Studies, and Analysis. Angelo State University 2017
M.B.A, Angelo State University 2018
B.A. in Middle Eastern Studies, American Military University 2012
Associates in Communication Application, Community College of the Air Force 2012

Professional Experience:

Adjunct Faculty
Angelo State University, San Angelo, TX 2020-Present
- Coordinated, reviewed and conducted classes for the Security Studies Program

End User Technician
ManTech International, Offutt AFB, NE 2019-Present
- Provided support to 1000+ pieces of equipment in support of Regional Infrastructure Support
- Enable connectivity of mission systems in support of Air Force and Intelligence Community objectives

System Administrator
Exeter Government Services, Goodfellow AFB, TX 2015-2019
- Subject Matter Expert for all Intelligence Community Tools utilized in training courses
- Directed 10 person team to update 20 year old software bringing the course of 600 annual users up to date with Intelligence Training Standards

Network Intelligence Analyst
US Air Force, Ft. Gordon, GA 2009-2013
- Advised managers and other senior personnel regarding mission requirements and collection posture to ensure efficient prosecution of mission objectives
- Profiled targets and their activities through compiling and integrating all-source reporting with respect to specific targets to further mission development
- Conducted and reviewed multiple type of cryptologic tasks to support strategic planning
- Led a team and target development of several counterterrorism missions, including a National Intelligence Meritorious Unit Citation winning mission in direct support of Operation Iraqi Freedom
- Provided continual communications with Intelligence Community Partners to refine requirements for cryptologic objectives

Liaison Network Officer
US Air Force, Kirkuk, Iraq June 2010-December 2010
- Awarded Joint Service Achievement Medal for cryptanalysis and communication analytics during deployment in support of Operation Iraqi Freedom and Operation New Dawn
- Utilized tools and techniques to assist local authorities to recover 500 fuses preventing their use for indirect fire attacks against the installation

- Determined the communication patterns of a target based on traffic analysis while also recognizing and analyzing anomalous metadata to ensure target viability
- Performed trend analysis of activities and communications in order to determine target behavior patterns and conducted technical research to facilitate target development

Specialized Tasks Performed:
- Defined target sets based on customer requirements resulting in many positive feedbacks from deployed forces and national-level agencies
- Monitored open and classified source for target information and interpreted all-source reporting to fulfill mission requirements and enrich analysis
- Gather and evaluated customer feedback to confirm successful fulfillment of specific mission requirements
- Profiled targets and their activities through compiling and integrating all-source reporting with respect to specific targets to further mission development
- Maintained awareness of emerging technologies and advancement by examining current trends and receiving training to support mission specific analytic modernizations goals
- Conveyed intelligence gained from target development and reported outcomes of the target development to customers and other relevant parties
- Prioritized target reporting based on mission requirements and performed quality control of products to ensure customers received relevant, timely, and accurate products
- Determined targeting significance of metadata and content and analyzed the data in order to develop new targets
- Performed trend analysis of activities and communications in order to determine target behavior patterns and conducted technical research to facilitate target development
- Provided input to target and technical requirements to improve mission products
- Gather and evaluated customer feedback to confirm successful fulfillment of specific mission requirements
- 950+ hours of Mobile Technologies, Digital Network, SIGINT Reporting, and Tool Usage Courses

Specialized Competencies:
- Project Management
- Signals Intelligence
- DCGS Familiarization
- Intelligence Reporting
- Intelligence Analysis Tools
- Processing Collected Data
- Target Communications Development and Analysis
- Intelligence Information Evaluation
- Prioritizing Intelligence Information
- Metadata Analysis
- Collection Techniques & Tools
- Collection Opportunity Identification
- Computer Network Data Analysis
- Interaction and Deconfliction Protocols
- Internet Technologies
- Operations Security Awareness
- Open Source Intelligence
