

Student Perception Survey

Grades 3-5

Survey Directions

You will be completing a survey that will provide important information about your teacher. A survey is different from a test. On a survey, you are asked for your opinion or point of view; there are **no right or wrong answers**, and you will not be graded. The reason you are taking this survey is to share how you feel about your teacher and what happens in your class.

Participation in this survey is **voluntary**. I will read some statements out loud, and you will answer it on your paper based on **what you really think or feel**.

While answering the questions on the survey, it is important to **only** think about me (your clinical teacher) and class you have been asked to respond about, and **not** other teachers. Your responses to the survey will be **private**. Your teacher and your principal will not know how you answered the questions. If you come to any question in the survey that you do not want to answer, you can leave it blank. If I read a question you don't understand or a word you don't know, please raise your hand for help.

For each question, choose just one answer that best fits what you think or feel, then fill in the circle for that answer. Don't pick an answer just because you think that's what someone wants you to say. Thank you for your honest feedback! Are there any questions before we begin?
